Transportation Song by Peter Weatherall

You can drive a car
You can drive a truck
You can ride on a train or in a bus

How do you get, from A to B?
Over land, through the air, or on the sea

You can ride a scooter
You can ride a bike
You can ride a unicycle if you like

How do you get, from A to B?
Over land, through the air, or on the sea

You can sail a yacht
if the wind is right
or inside a submarine
if its watertight

How do you get, from A to B?
Over land, through the air, or on the sea

You can fly a plane
Way up in the sky
Or a helicopter
If you want to try

How do you get, from A to B?
Over land, through the air, or on the sea

You can catch a taxi
If you have the fare
Or you can walk
From here to there
How do you get, from A to B?
Over land, through the air, or on the sea

You can fly a rocket ship
If you have been taught
But first you have to train to be
An astronaut

How do you get, from A to B?
Over land, through the air, or on the sea

How do you get, from A to B?
Over land, through the air, or on the sea
